Re: Ex Parte Notification – WT Docket No. 96-86

Dear Ms. Salas:

On April 6, 2000, David Eierman, Motorola; Ernie Hofmeister, Ericsson; Ron Haraseth, APCO; and Carleton Wells, State of Florida, met with Peter Daronco and Katherine Hosford of the Public Safety and Private Wireless Division of the Wireless Telecommunications Bureau of the Federal Communications Commission. The attendees discussed petitions for reconsideration and technical issues related to the above captioned proceeding

Specifically, the parties discussed the 700 MHz Narrowband voice channel bandplan. The parties discussed the National Public Safety Telecommunication Council (NPSTC) petition for reconsideration to change the location of the narrowband voice interoperability channels within the bandplan to separate blocks of interoperability channels about 250 kHz apart to allow implementation at the same antenna site. The parties also discussed changes to location of narrowband reserve channels necessary if the interoperability channels are moved.

The parties also discussed the operation of the proposed 700 MHz secondary trunked interoperability channels and interoperability trunked talk groups versus the operation of conventional interoperability channels as used on 821 MHz NPSPAC interoperability channels. The parties also discussed typical distances to be used for 700 MHz co-channel and adjacent-channel site separation compared to separation distances used on NPSPAC channels.

Please contact Jeanine Poltronieri at (202) 371-6896 regarding any questions concerning this matter.

Respectfully Submitted,

Jeanine Poltronieri  
Motorola, Inc.
